

## **FlipChip International Announces ITAR Registration & Approval**

Phoenix, Arizona, October 28, 2008 -- FlipChip International announces successful International Traffic in Arms Regulations (ITAR) registration from the US Department of State, Bureau of Political-Military Affairs. ITAR registration allows FlipChip International to extend its semiconductor services of Wafer Level Packaging and Flip Chip semiconductor bumping to products inherently military in nature.

The FCI bump facility in Phoenix, Arizona is the largest remaining independent merchant bumping service in the USA supplying turnkey solutions to customers.

ITAR regulations were designed to control the information and materials of military related technologies and ensure that military technologies are only shared with US individuals. The ITAR registration of a company allows them to work on military related products and projects.

FlipChip International, LLC is a privately held supplier of products and services for the wafer bumping and wafer scale packaging semiconductor market. FlipChip International, LLC is a wholly owned subsidiary of RoseStreet Labs LLC, a supplier of products and services for the life sciences, semiconductor services and renewable energy markets.
